

Kishore R Software Developer | Gen AI Enthusiast

✉ kishoreramesh302006@gmail.com ☎ +91 8807011265 🌐 GitHub: Kishore-R45 🔗 Portfolio
🌐 LinkedIn: kishore-r45 📄 LeetCode: Kishore2006_30 📍 Chennai, Tamil Nadu, India

Summary

- Highly motivated IT student specializing in **Software Development, Generative AI, Java-Full Stack and MERN stack** with experience in building scalable applications and solving complex problems using modern technologies.

Projects

AI-Powered Document Intelligence System 🔗

- Enables document upload, vector indexing, and semantic querying through a Retrieval-Augmented Generation (RAG) pipeline integrating Sentence-Transformers embeddings, Pinecone vector search, and HuggingFace LLM inference.
- Implements JWT-based authentication, biometric access control, document lifecycle tracking with expiry alerts, offline data persistence, and real-time push notifications via Firebase FCM.
- Tech Stack:** Flutter · Flask · MongoDB · Pinecone · Sentence-Transformers · HuggingFace LLM · Firebase FCM

Real-Time Freshness Indicator 🔗

- Developed an image-based freshness detection system using transfer learning (MobileNetV2) to predict freshness scores and estimate shelf life via quadratic decay modeling under multiple storage conditions.
- Implemented dynamic freshness classification (fresh / consume soon / spoiled), condition-based storage recommendations, analytics dashboard visualization, and multi-format image processing through a RESTful backend.
- Tech Stack:** React · Flask · TensorFlow/Keras · MobileNetV2 · Chart.js · Tailwind CSS · Docker · HuggingFace

Smart Attendance Tracker App 🔗

- Developed a secure location-aware attendance tracking application with geofencing, WiFi validation, and device verification to prevent proxy attendance and unauthorized check-ins.
- Implemented authentication, session management, attendance history tracking, and calendar-based visualization
- Tech Stack:** Flutter · Node.js · Express.js · PostgreSQL (Neon) · Geo-Fencing · Gradle · Android Studio

Professional Experience

12/2025 – Present Chennai	Software Developer Intern Ethical Intelligent Technology LLP - Developing an Industrial safety monitoring system for PPE compliance, fall and fire detection using OpenCV and DeepLearning Techniques. Tech stack: React.js, Flask, OpenCV, AWS S3, ResNet, RTSP
------------------------------	---

Education

08/2023 – Present Chennai	Easwari Engineering College B.Tech Information Technology CGPA - 8.13
06/2016 – 03/2023 Theni	NS Boys Higher Secondary School Higher Secondary HSC - 88%

Technical Skills

Frontend: React.js, Tailwind CSS, Flutter (Android)
Backend & DB: Node.js, Springboot, Flask, MongoDB
Core CS: DSA, DBMS, OS, OOPs, System Design
Programming Languages: Core Java, Python, C
Gen AI: RAG, Langchain, Transformers, MCP Servers
Tools: Git, AWS, Hugging Face, Postman, Docker, Figma, Android studio.

Achievements & Awards

- Best Coder Award - IT Excellence Awards 2026
- Winner in Coding Contest - Enthral 2K26
- Winner in Tech Quiz - SRM IST (AIRA 2K26)
- Smart India Hackathon 2024 & 25 College level Finalist

Certifications

- Oracle Java SE 17 Developer Certification (Professional)
- Cisco - CCNA 1, 2, 3 Certifications
- Udemy - Full stack Web Development
- Microsoft - Fundamentals of Generative AI
