## SUMMARY

- Highly motivated IT student with a passion for Software Development and AI. Skilled in building and deploying web applications with experience in project management. Proficient in the MERN stack and Java Full stack development.
- Seeking an opportunity to contribute to impactful projects and enhance my technical expertise. Develop innovative solutions by leveraging my knowledge in data structure, algorithms, and Emerging technologies to solve problems.

## SKILLS

**Frontend:** React JS, Tailwind CSS , Flutter.

**Backend & DB:** Node JS, Express JS, SQL, Mongo DB.

**Programming & Core CS:** Java, Python, DSA, OOPs, DBMS, OS.

**Gen AI:** RAG, Langchain, Vector DB, MCP Servers

**Tools:** Git, AWS, Docker, Figma, Android studio, Postman, Hugging Face .

## PROJECTS

|            |                                                                                                                                                                                                                                                                                                                                                          |                                               |
|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| Gen AI     | <b>AI-Powered Document Intelligence System</b><br>Developed a production-grade document intelligence system enabling secure upload, semantic search, OCR-based extraction, and deterministic AI-driven question answering with zero-hallucination validation. Tech stack: React JS, Tailwind CSS, Flask, MongoDB, Pinecone, AWS S3, Hugging Face, Docker | <a href="#">GitHub</a>   <a href="#">Live</a> |
| AIML       | <b>Real-Time Freshness Indicator</b><br>CNN-based model with non-linear decay analysis to estimate fruit and vegetable shelf life, and deployed Tech stack: React JS, Tailwind CSS, Flask, Tensorflow, Keras, Docker, Hugging face,                                                                                                                      | <a href="#">GitHub</a>   <a href="#">Live</a> |
| Full-Stack | <b>Farmer Advisory &amp; Query Support System</b><br>Personalized crop advisory, Weather alerts, Market price updates, Fine-tuned chatbot, Expert connect Tech stack: Flutter, Node JS, Mongo DB, MySQL,Market price API, Weather API, Government Scheme API                                                                                             | <a href="#">GitHub</a>   <a href="#">Live</a> |
| App Dev    | <b>Smart Attendance Tracker App</b><br>Authentication & Security, Geo Fencing, WIFI & Device Verification, Calendar View, History Management Tech stack: Flutter, Node JS, Express JS, Neon (PostgreSQL), Geo-Fence, Gradle, Android Studio                                                                                                              | <a href="#">GitHub</a>   <a href="#">Live</a> |

## EDUCATION

|             |                                                                                           |               |
|-------------|-------------------------------------------------------------------------------------------|---------------|
| 2023 - 2027 | <b>Easwari Engineering College, Chennai</b><br>B.Tech Information Technology - CGPA: 8.13 | Undergraduate |
| 2011 - 2023 | <b>NS Boys Higher Secondary School, Theni</b><br>HSC : 88% - PCMB                         | School        |

## EXPERIENCE

|                      |                                                                                                                                                                                                                        |                                      |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| Dec/2025<br>Present  | <b>Software Developer Intern</b><br>Developing an Industrial safety monitoring system for PPE compliance, fall and fire detection using OpenCV and Deep Learning Techniques. Tech stacks: OpenCV, AWS S3, ResNet, RTSP | Ethical Intelligent Technologies LLP |
| Jan/2025<br>Apr/2025 | <b>Java Full Stack Intern</b><br>Worked on Core Java and Spring Framework. Built scalable web apps with REST APIs, frontend integration, and deployed projects like an Expense Tracker with role-based access.         | ZIDIO Development                    |

## ACHIEVEMENTS

- Innovate & Inspire season 13 winner - coding contest.
- SIH-2024 & 2025 College level finalist

### Certifications:

- **Oracle:** SE 17 Java Developer Certification
- **Cisco:** CCNA 1,2,3 Certifications
- **Udemy:** Full stack web development

### Coding Profiles:

- [LeetCode](#) – 900+ Problems solved
- [GeeksforGeeks](#) – 250+ Problems solved
- [Hackerrank](#) – 3 Certifications & Problem solving
- [CodeChef](#) – 20+ Contests with good rank
- [CodeForces](#) – 2+ Contests with good rating
